

Bill 259 – PH 3/12/14

It has come to my attention that you are considering changing the drug free zone around schools, day cares, etc. from 1500 feet to 200 feet. I can see absolutely no good reason to do this. If you are worried about the drug dealers not being treated fairly, don't be, they would not think twice about selling drugs to your children or anyone else's. You should be more concerned about taking drug dealers off the streets altogether, rather than passing laws about where they can and cannot sell drugs. If the law remains as is, at least you are making it harder for them.

Thank you for considering this as my testimony.
